DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably independent or distinct species: Species 1, corresponding to figure 16; and Species 2, corresponding to figure 18.

The species 1 and 2 are independent or distinct because:

(i) Each of species has a different characteristics or utility for each identified species. For example, the utilities in species 2 depicted at S104 and S108 are not utilized in species 1; and

(ii) these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, generic claims are claims 1, 9-10, and 20.

There is an examination and search burden for these patentably distinct species due to their independent or distinct characteristics. or utility. The species requires a different field of search; and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 USC 101 and/or 35 USC 112, first paragraph.

Applicant is advised that a reply to this requirement to be complete must include an election of species to be examined even though the requirement may be traversed (37 CFR 1.143). An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically

Art Unit: 2624

point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In neither instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 USC 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
